RE: Site Inspection, Newco Guyana Inc., Coyote Knolls Project, S/023/033, Juab County, Utah

Date of Inspection: October 18, 2000
Time of Inspection: 8:30 a.m.
Conditions: Sunny, pleasant
Participants: Bob Steele; Tom Munson, DOGM

Purpose of Inspection: To inspect the site while in the area

I arrived at Bob Steele's house at 8:30 a.m. From there we drove out to the Jericho turnoff, where I then left my vehicle and got in Bob's vehicle and proceeded to Coyote Knolls Project. There is a turnoff road that goes right to Coyote Knolls, which Bob stated was a county road and will be graveled and taken over by the County. I told Mr. Steele that we would need a letter from the County to verify this.

The Coyote Knolls project is a silica gold/silver project taken over by Lawrence Fahn. It basically looks the same as the last time I was at the site. There is a trench with debris on either side of the trench and at one end there is water tank. Pictures were taken. I did not GPS the area.
